- ✦ Open Architecture
- ✦ Unrestricted Number of Cameras
- ✦ Smart, Web and Mobile Clients Options
- ✦ Active Directory Integration
- ✦ GDPR Compliant
- ✦ Range of Maintenance & Support packages

When Milestone developed XProtect in 1998, the video surveillance industry was vastly different than today. CCTV and analogue equipment ruled the market, and black & white footage were the norms for most video surveillance operations. Fast forward to today and the video surveillance systems are capable of so much more. From crystal-clear HD footage to body-worn cameras and advanced video analytics, to facial recognition, access control and IoT devices, building video solutions requires a solid foundation - it required XProtect.

Choosing XProtect as a foundation means choosing a solution developed by innovative surveillance experts who work to solve challenges. With 20+ years on the market, XProtect has proven to be the right answer for more than 500,000 customers worldwide.
