# MILESTONE XPROTECT® RAPID REVIEW

Advanced Forensic Video Analysis

## FIND WHAT YOU'RE LOOKING FOR, FAST.

12.36

◆ **milestone** | **XProtect®** Rapid REVIEW

With XProtect Rapid Review powered by BriefCam, you get an advanced forensic video analytics add-on solution that enables you to quickly review and analyse video content to find what you are looking for, fast.

### SEARCH
### Accelerate Investigations

Video footage often captures incidents that need to be investigated. Typically, manual forensic review of archived footage is time-consuming. XProtect Rapid REVIEW enables fast, and intelligent multi-camera searches based on an expanding suite of analytic search filters across multiple cameras.

### DISCOVER
### Unlock the value of video

Take your installation beyond security and achieve additional value of your video with the ability to analyse object activity, common paths and dwell times. The results are easily readable visualisations that give you the power to forensically pinpoint areas with most occupancies for greater scene understanding and insights.

### SELECT
### Smart case management

Intuitively select video sources through the seamless XProtect Rapid REVIEW integration, instantly create search cases, and organise all investigation video in a single container to efficiently and effectively review video from within the XProtect user interface

## Case Management

Organize all video assets of an investigation in a single container, bookmark objects of interest, and summarize case findings (including all relevant exhibits) in an exportable report, while dynamically collaborating on cases with other users.

## Multi-camera Search

Advanced multi-camera search powerfully identifies men, women, children and vehicles of interest with speed and precision, using face recognition, appearance similarity, apparel, colour, size, speed, path, direction, dwell time and illumination change filters.

## Licence Plate Recognition

Differentiated license plate recognition, designed especially for "in the wild" surveillance scenarios and ease of operation in finding license plates through watchlists, existing video or data uploads.

## Proximity Identification

Search and identify the distance between individuals over time and location for compliance with physical distancing and for contact tracing.

## Face Mase Detection

Apply Face Mask attribute filter to search and identify face mask usage across video.

## Appearance Similarity

Instantly locate people, vehicles, and other items of interest by searching for objects with similar attributes.

## Filter Tolerance

Adjust tolerance levels to refine search results for class, attributes, color, dwell time, direction, area, path, face recognition and appearance similarity.

## Line Crossing

Detect, filter and count objects that cross a demarcation in a pre-defined direction to drive perimeter protection and directional object count.

## Visual Layers

Create visual analytics and heatmaps for activity, dwell time, common paths and background changes.

## Density & Speed Control

Increase or decrease the number and speed of events shown at once.

## Sort Control

View events by relevance or by order of occurrence and easily zoom in on items of interest.
