

ANT-36500 AIRGAP

Secure AirGap

The ANT-36500 is an Encoder + Decoder units configured to provide a secure AirGap between networks, effectively isolating them as a video diode.

The AirGap is based on the successful 35000 Video Encoder and 36000 Video Decoder units.

The Encoder supports Ethernet input with secure connection to the decoder via a HD-SDI connection, which is un-hackable and as such secure linkage between the two networks. The Encoder is fully ONVIF Profile S+G compliant.

The Decoder will decode an IP stream in RTSP, ONVIF (discovery) or MPEG-TS stream formats.

The unit has dual power supplies to ensure complete network and system isolation.

KEY FEATURES

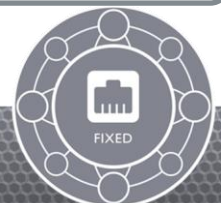

- ✦ Network Isolation
- ✦ HD-SDI interconnection
- ✦ 1u Rack Mounted
- ✦ Dual 240v AC Power Input
- ✦ ONVIF, RTSP or MPEG-TS input formats
- ✦ ONVIF, RTSP or MPEG-TS output formats
- ✦ Approved for use with Milestone, Genetec and other VMS

.....delivering seamless network solutions
